

Table of Contents

Invited Talk

| | |
|--|---|
| Combining logic-based agents and decision theory | 1 |
| <i>Robert A. Kowalski</i> | |

Tutorial Programme & SOCS Dissemination

| | |
|--|---|
| BDI Agent Programming in AgentSpeak using <i>Jason</i> | 2 |
| <i>Rafael H. Bordini</i> | |
| The <i>KGP</i> Model of Agency | 3 |
| <i>Fariba Sadri, Kostas Stathis</i> | |
| Programming Rational Agent Groups using Executable Logics | 4 |
| <i>Michael Fisher</i> | |
| Specification and Verification of Agent Interaction using <i>SOCS-SI</i> | 6 |
| <i>Federico Chesani, Marco Gavanelli</i> | |
| Norms and Institutions in Agent Societies: the Language $(\mathcal{C}/\mathcal{C}^+)^{++}$ | 7 |
| <i>Marek J. Sergot</i> | |
| Programming Multi-Agent Systems in <i>Qu-Prolog</i> | 8 |
| <i>Keith Clark, Silvana Zappacosta-Amboldi</i> | |
| Multi-Agent Systems in Logic Programming: Challenges and Outcomes of the SOCS project | 9 |
| <i>Francesca Toni, Paolo Torroni</i> | |

Regular Papers

| | |
|---|----|
| Verification of Protocol Conformance and Agent Interoperability | 12 |
| <i>Matteo Baldoni, Cristina Baroglio, Alberto Martelli, Viviana Patti</i> | |
| A Semantics for Agent Communication Languages Based on Commitments and Penalties | 28 |
| <i>Leila Amgoud, Florence Dupin de Saint-Cyr</i> | |
| Reasoning about Epistemic States of Agents by Modal Logic Programming | 40 |
| <i>Linh Anh Nguyen</i> | |
| Decision Procedure for a Fragment of Mutual Belief Logic with Quantified Agent Variables | 57 |
| <i>Regimantas Pliuskevicius, Aida Pliuskeviciene</i> | |

| | |
|--|-----|
| Strongly Complete Axiomatizations of “Knowing At Most” in Standard Syntactic Assignments | 73 |
| <i>Thomas Ágotnes , Michal Walicki</i> | |
| Logical Spaces in Multi-agent Only Knowing Systems | 88 |
| <i>Bjørnar Solhaug, Arild Waaler</i> | |
| Combining Answer Sets of Nonmonotonic Logic Programs | 104 |
| <i>Chiaki Sakama, Katsumi Inoue</i> | |
| Speculative constraint processing with iterative revision for disjunctive answers | 119 |
| <i>Martine Ceberio, Hiroshi Hosobe, Ken Satoh</i> | |
| Constitutive Norms in the Design of Normative Multi-Agent Systems | 135 |
| <i>Guido Boella, Leendert van der Torre</i> | |
| Contextual Terminologies | 151 |
| <i>Davide Grossi, Frank Dignum, John-Jules Ch. Meyer</i> | |
| Contract Related Agents | 168 |
| <i>John Knottenbelt, Keith Clark</i> | |
| Profiles of Behaviour for Logic-Based Agents | 184 |
| <i>Fariba Sadri, Francesca Toni</i> | |
| Diagnosis of Plan Execution and the Executing Agent | 201 |
| <i>Nico Roos, Cees Witteveen</i> | |
| Intention Recognition in the Situation Calculus and Probability Theory Frameworks | 216 |
| <i>Robert Demolombe, Ana Maria Otermin Fernandez</i> | |
| Ability in a multi-agent context: a model in the Situation Calculus | 231 |
| <i>Laurence Cholvy, Christophe Garion, Claire Saurel</i> | |
| A Default Theory of Trust | 246 |
| <i>Johan W. Klüwer and Arild Waaler</i> | |
| Contest Papers | |
| The First CLIMA Contest | 261 |
| <i>Mehdi Dastani, Jürgen Dix</i> | |
| Using Pheromones, Broadcasting and Negotiation for Agent Gathering Tasks | 267 |
| <i>Simon Coffey, Dorian Gaertner</i> | |
| Reactive food gathering | 274 |
| <i>Robert Logie, Jon G. Hall, Kevin G. Waugh</i> | |

| | |
|---|-----|
| Extending Tropos for Prolog Implementation: A Case Study Using the Food Collecting Agent Problem | 281 |
| <i>Carlos Cares</i> | |
| Strategies for Multi-Agent Coordination in a Grid World | 288 |
| <i>Eder Mateus Nunes Gonçalves, Guilherme Bittencourt</i> | |
| Author Index | 293 |
